

## Grid Development Manager - Position Description

### Job title

Grid Development Manager

### Reports to

The Grid Development Manager will report to the Director of Development

### Position overview

The Grid Development Manager will be responsible for preparing and managing all grid connection applications for current and future wind projects in the growing Tetris Energy portfolio. This will include identifying opportunities in the network, preparing connection enquiries, overseeing connection applications, co-ordinating specialist network modellers and negotiating favourable technical and commercial outcomes in the Offer to Connect. Reporting directly into the Director of Development.

### Responsibilities and Duties

The role will include:

- Identifying and pursuing connection opportunities within Transmission & Distribution networks.
- managing and taking responsibility for the process of grid applications, ensuring they are submitted in a timely manner and progress through the NSP and Australian Energy Market Operator (AEMO) processes
- co-ordinating specialist network modelling and technical sub-consultants
- maintaining relationships with NSP's and OEM's to drive performance and ensuring they deliver their services to company standards.
- taking responsibility for grid intelligence and implementation of new connection methods arising from policy changes and changing industry standards.
- providing technical assistance during project development, including development of balance of plant tenders and requirements to ensure the factors influencing and influenced by the grid connection are considered.
- supporting the delivery of projects once they reach construction by providing grid expertise to the project managers throughout the project lifecycle.

### Qualifications and skills

- Relevant tertiary degree qualification
- Working knowledge of the current NEM network status, potential constraints, upgrades, and connection opportunities
- Thorough understanding of the current and future National Electricity Rules
- Experience in dealing with AEMO, the Network Service Providers and grid modelling consultants required to progress projects through GPS and connection negotiations

- Capable of resolving complex connection issues and ability to communicate technical issues to commercial team
- Strong project management capability, including the ability to manage multiple projects simultaneously
- Good communication skills and the ability to provide grid connection advice to broader commercial team
